

Guidelines for Fellowship and Data Stewardship Scholarship Reports for *Past Global Changes Magazine*

March 2023

General style

[PAGES IAI-Fellowships](#) and [PAGES Fellowships for Africa](#), and [Data Stewardship Scholarship \(DSS\)](#) recipients have to submit a short article to be published in the [Past Global Changes Magazine](#) in English. Reports should be written for an interdisciplinary, international audience. *Past Global Changes Magazine* is distributed widely, not only within the PAGES and paleoscience communities, but also more broadly to other Earth system scientists, students and interested non-scientists.

PAGES IAI and Fellowship for Africa Fellowship reports should aim to describe the research activities carried out during the fellowship i.e. what scientific question motivated the fellowship application, what the most significant scientific results and conclusions were, and/or outcome(s) and future plans.

DSS reports should summarize the advances in a specific topic, or scientific questions that will be answered thanks to the DSS. Particular emphasizes should be given in case there are new tools, public databases or publications which stem from the work made during the DSS.

Structure

- The article should follow a clear and logical structure.
- The title should be appealing, concise, informative, and capture the reader's interest. This should be followed, in the case of fellowship reports, by a short summary with information about the awardee, PAGES fellowship, host institution, dates and objectives (max 75 words). For the DSS report, there should be a short intro about the achievements during the DSS (max. 30 words).
- Fellowship reports are published on one magazine page.

Language

- When possible, consider using the active voice for clarity and conciseness, e.g. "Brown et al. investigated the relationship ..." instead of "The relationship was investigated by Brown et al. ..."
- Opt for verb-based sentence constructions over noun-based, e.g. "This approach improves Brown's design..." ... instead of "This approach is an improvement on Brown's design ..."
- Keep abbreviations, brackets, parentheses and quotations to a minimum, and anything else that interrupts the flow of reading.
- Use short and simple sentences, and where possible, choose the simpler version of words over more technical and complicated word, e.g. "XYZ" instead of "XYZ".
- Avoid going into detail and technicalities that would only be relevant to a fraction of the readers. Interested readers can refer to the original publications, or contact you if they want more information.

Text format

- All the articles have to follow the PAGES guidelines (see final checklist at the end of this document). Text, references and figure captions (but not figures) should be submitted in one Microsoft Word file using the **corresponding template**. If these conditions are not met, articles will be returned to the contact author.
- Text is submitted as a word file, including references and captions, following the template. The manuscript file should be named following this structure: 'Author last name_year'.

- The body of the article, including figure captions, should be **650–700** words.
- Use **US English spelling**, e.g. “summarize”, not “summarise”, “paleo”, not “palaeo”.
- Keep figure captions and acknowledgements as short as possible.

Author information

- Maximum **7 authors** (if there is more than one author). The fellow is always the first and contact author.
- Provide the name and email address of one corresponding author as follows:
Mara Gutiérrez: mguti@env.pca.mx
- Format authors and affiliations in the following way:
Mara Gutiérrez¹ and E. Román²

¹Department of Environmental Sciences, University of Pachuca, México
²Department of Biogeochemistry, Universidad de los Grandes Lagos, Córdoba, Argentina
- The first name of the lead author should be spelled out, e.g. Mara Gutiérrez. Use initials for co-authors, e.g. E. Román. If there are only two authors, spell out both first names.
- Affiliation format: Department, University, City (if not in the University name), Country. Do not include street addresses or postal codes.
- Avoid acronyms and use English institution names whenever possible.
- Authors are invited to have their [ORCID](#) associated with their articles. If this is applicable, please include your ORCID in your submitted manuscript.

References

- **The number of references is limited to 7.**
- All citations in the text should follow this format: (Schmidt et al. 2005).
- Multiple in-text citations should be ordered alphabetically and separated by a semi-colon, e.g. (Anthony et al. 2010; Burger 1965; Turner et al. 1989, 2010; Zulu 2005).
- Use “et al.” when there are more than two authors or editors.
- Only publications that are at least “in press” (and have a doi) will be included in the reference list. Other references can be cited in the text as “unpublished data” or “personal communication”.
- Reference list must be ordered alphabetically.
- You can download the **PAGES Magazine Endnote style** at:
<http://www.pastglobalchanges.org/my-pages/contribute-to-magazine>
- All referencing software field codes must be removed. In Word, select all text (Ctrl+A) and press: Ctrl+Shift+F9 (Win), Cmd+Shift+(Fn)+F9 (Mac).
- **Provide a DOI-URL (<https://doi.org/DOI>) for all of the references** (e.g. <https://doi.org/10.1016/j.quascirev.2013.05.024>) copied beneath each reference. If the reference has no DOI, use a direct link to the abstract (e.g. <http://revistas.usal.es/index.php/0514-7336/article/view/7225>).
- Use article number if no page number is available.
- Journal names must be abbreviated. A good list of abbreviations for Earth Science journals can be downloaded here: <https://www.wsl.ch/en/publicationssearch/list-of-journal-abbreviations.html#Q>

Figures and logos

- **One figure must be added.** It must be a scientific figure or photo that is relevant and well connected to the text. **No group photos.**
- **The figures should contain only the relevant information that is also mentioned in the text. Labeling should be as non-technical as possible.** Figures should not be too large, as space for the articles is limited.
- Figures and graphs should be submitted electronically in an **editable (vector) format** (e.g. **pdf, eps or ai**), and saved or exported directly from the software used to create them.
- Figure files do not include the captions or 'figure number'. The figure files should be named following this structure: 'Author last name_year_Fig.X'.
- Avoid using a non-color-blind friendly palette (e.g. combination of red, green and brown) in the figures.
- In the text, refer to figures in the text body as follows: "Figure 1a shows...", but in parentheses as follows: "(Fig. 1a)."
- In the caption, refer to the panels with (A), (B)...
- The figure must be **original**, significantly **modified from previously published versions** and cited as "Figure modified from..." in the caption, **or permission for reprint must be obtained.**
- Figures and photos must be high resolution, **no less than 300 dpi** (min. 12 cm wide, or in A4 size = min. 2550 x 3300 pixels), and saved as psd, tiff, png, pdf, or jpeg.
- For the fellowship reports, if available and if there is enough space, two logos can be added (home and host institution), with the same resolution as specified for the figures.
- If available, please use the font "Helvetica" for all texts in the figures.
- Please give image files short but descriptive names.
- Please adhere to United Nations naming conventions for maps used in your manuscript. In order to depoliticize scientific articles, authors should avoid drawing borders, or use of contested topographical names. The editors reserve the right to insert the label "under dispute" if contested borders are presented. If disputed territories are relevant for your map, please make sure that the figure caption stays neutral, as well as the legend and labelling within your map.

Technical styles

- For ages and dates, please use “yr” instead of “a:” “15 kyr BP” not “15 ka”.
- Use CE/BCE or BP (but not both CE/BCE and BP). Do not use AC/BC.
- Use double quotes: “word” not ‘word’.
- Use capitals after a semicolon in titles and figure captions but not in the text body.
- Do not place a comma after “i.e.” and “e.g.” (for example, “e.g. x, y, and z”, not; “e.g., x,y, and z”)
- No italics for Latin words: “in situ”, “vice versa”, “per se”.
- No italics for non-English words: “Longue durée”, “fjord”.
- No space between numbers and °C, %, >, ... but spaces before cm, m, kg.
- Spell out numbers <10, ≥10 in digits: “six,” “65”.
- Use the Oxford comma in lists: “x, y, and z” (not: x, y and z”).
- For units, use fractions rather than negative exponents: “mm/yr” not “mm yr⁻¹”.
- For long domain names (e.g. Youtube links or similar), use a [short-url](#) instead.

Plagiarism

- Read PAGES’ plagiarism and ethics in publishing policies here:
<https://pastglobalchanges.org/publications/pages-magazines/pages-magazine>
- To plagiarize means to claim someone else’s ideas or words as one’s own. Plagiarism includes, but is not limited to, the acts of:
 - (1) (Near-)verbatim copying or purposely paraphrasing portions of another author’s work;
 - (2) (Near-)verbatim copying portions of one’s own published work (self-plagiarism);
 - (3) Using or citing someone else’s ideas, words or illustrations that are not common knowledge without properly acknowledging the source.
- Plagiarism in all its forms is an act of fraud and constitutes a serious ethical offence. No plagiarized articles will be published in *Past Global Changes Magazine*. Consequently, all submitted manuscripts are screened for plagiarism and appropriate measures will be taken in such cases.

CHECKLIST FOR AUTHORS (Fellowship and DSS Reports)

- Article is submitted in a word document using the template.
- Report (including figure captions) is 650–700 words.
- Text has passed a US English spell check.
- The author list is in the correct format, and there are no more than seven.
- The email of the corresponding author is provided.
- References are in the correct format and in alphabetical order.
- Max. 7 references. A DOI-URL to the articles is provided.
- All references are referred to in the text.
- One figure with caption is provided and referred to in the text.
- The figure has been modified from previously published versions OR permission to reprint has been obtained.
- The figure and logos are in separate files to the text, and are in an editable (vector) format.
- Photos have a resolution of 300 dpi or more.
